

The background is a deep space scene. It features a dark, star-filled sky. There are several green nebulae or gas clouds scattered throughout, with a prominent one in the upper right and another in the lower left. A small, dark, spherical planet or moon is visible in the upper right quadrant, partially obscured by the text.

NOW, EXPAND SCENES & SYSTEMS

URBAN SCENE EXPANSION

BETTER LAND PLOTTING

Before: A single city tile, one rectangle

After: multi-plot city generator that places, connects, and road-seals several tiles into one coherent urban footprint

LAND ZONING

Before: No category, everything placed together

After: each City tile gets 1 zone [Residential, Commercial, Landmark, Park], each zone has its own style

FOREST SCENE

TERRAIN CREATION

Perlin Terrain Generation (for realistic uneven ground)

FOREST PATH/RIVER PLOTTING

River: edge-to-edge, meandering, concave mesh curve

Paths: main + branch + dead-end network

DAY-NIGHT CYCLE

AUTOMATED LIGHTING OVER FULL DAY

Can run as Simulation or Manually chosen → easily integrated into AI assistant for users

Sun + Moon movement across sky

Realistic Day to Night changes with Sunset & Sunrise hues

MORE EXCITING NEWS: MARKETING STRATEGY

Platforms: Tiktok/X/XHS

- Present Graphyti-generated environments as "recovered footage" from alternate timelines, futures, and unknown worlds
- Themes: post-apocalyptic cities, dreamcore spaces, fantasy worlds, uncanny landscapes, and futuristic environments
- Use minimal in-universe captions (dates, coordinates, incident logs) to encourage mystery

- Gradually introduce subtle glitches, wireframes, and system artifacts to hint at the simulation technology behind the footage
- Integrate company milestones and announcements into the narrative world rather than breaking the fiction
- Goal: build an audience around storytelling and curiosity while organically showcasing Graphyti's scene generation capabilities and brand identity
